MSAA Contact: pd@msaa.net

Teachers and students are frustrated in classrooms where disruptive behavior reduces opportunities to learn. In this workshop, participants will enhance their management techniques and gain new confidence when presented with challenging students and situations. Using case study analysis, role plays, and research as well as proven protocols and routines, participants will leave with a more complete picture of effective classroom management and tools to make their vision a reality.

Participants will:

- Identify the common causes of disruptive behavior and develop an expanded repertoire of prevention techniques, intervention strategies and communication skills that have proven effectiveness with a broad range of students.
- Plan for a climate of learning that is responsive to student needs and minimizes disruptions.
- Implement daily routines and procedures that serve to increase efficiency, build responsibility in students and maintain order in the classroom.
- Design and deliver a comprehensive classroom discipline plan which promotes fairness and responsibility for behavior.

Brad Morgan Brad Morgan has been consulting for Teachers21 for the past four years in the areas of educator evaluation, transitions, classroom management, and the growth mindset. After 13 years as a principal at both the middle and high school levels, Brad will assume a new role as the Superintendent of Schools for North Middlesex Regional School District in July 2018. In addition to Teachers21, Brad has served as a long-time consultant for the Massachusetts Department of Elementary and Secondary Education as well as a professor at Endicott College and the University of Massachusetts Boston in their respective schools of education.
