Not sure how to make the most out of those devices you have access to? Do you strive to create learning experiences that foster 21st-Century learning, but are unsure where to start? Participants will explore how web-based resources, educational apps and accessibility features can support student's academic, behavioral and social emotional needs. Educators will gain confidence in using devices as instructional tools, by learning about various apps and resources that can assist in bringing teaching and learning into the 21st Century.

Participants will:

- Investigate digital pedagogies such as TPACK and SAMR.
- Discover ISTE standards, and how ed tech resources support these standards.
- Explore web based resources and apps that enhance students abilities to communicate, create, collaborate and think critically.
- Investigate how hyperdocs are used to differentiate instruction.
- Explore extensions and accessibility features that provide equitable access to learning for ALL students.
- Create a technology enhanced, standards based, learning experience that can be implemented.

Maureen Gilman is an adjunct professor with classroom experience teaching in Grades 1–5. She is a trained DESE mentor and works for Merrimack College and Endicott College as a cooperating practitioner for student teachers. Presently, she teaches a course for Endicott College titled "Integrating Technology in the Classroom," which focuses on introducing research-based theories, practices, and curricula related to technology. She understands the importance of incorporating 21st-Century skills that are needed for the future success of our students.
